

COVID-19 Isolation Precaution Decision Tree

Individual is identified who has confirmed or suspected COVID-19 infection (e.g., meets criteria in the [Identification Process Flow](#))

1. Notify Regional Director, Clinical Practice
2. Place [client on isolation](#)
Individual is not to go to work/school or community events

- Isolation quick start guide:** (refer to [Isolation Procedure](#) for details)
- Notify Leadership immediately
 - Director of Clinical Practice will provide support and assistance (including PPE order, isolation set up and education of team members)
 - Individuals should be in a single-person room with the door closed
 - Separated from others by a minimum of 6 feet
 - Individual should be assigned their own bathroom - **NO ONE ELSE** should use this bathroom (disinfect after each use)
 - **DO NOT** share household items
 - Encourage the individual served to wear a mask and frequently wash their hands
 - Implement full visitor restriction by posting [this sign](#)
 - Team members in direct contact should wear PPE (N95 mask, gloves, gown and eye protection)
 - PPE is disposed of inside the individual's room
 - Common surfaces should be cleaned twice daily

Does the individual served have symptoms requiring immediate hospitalization:

- Very difficult breathing (not helped by prescribed medication)
- Loud wheezing
- Increased confusion
- Fever/chills
- Mental changes
- Chest pain
- Blue Lips or tongue
- Clammy skin
- Decreased level of consciousness

[Pneumonia Protocol](#)

NO →

- Does the person served require non-emergent medical attention:
- More difficulty breathing than usual, made worse by activity
 - Increased coughing
 - Increased restlessness, confusion or behaviors
 - Irritability

YES ↓

NO ↓

If transporting individual:

- Health care provider, MD/ER must be notified in advance that the individual has confirmed or suspected COVID-19 infection
- Persons transporting the individual should wear an N95 mask, gloves, gown and eye protection.

YES ↓

Call 911: notify dispatch that the individual has confirmed/suspected COVID-19

Is individual returning to the home following medical treatment?

YES →

Evaluate for ability to safely provide care/support services in ICF/Waiver Home:

1. Contact Region Clinical/Quality Resource
2. Conduct IDT meeting to review modifications to person's plan

Considerations:

- Is it possible to isolate the individual served?
- Is staffing sufficient to meet the needs of the individuals served?
- Are family involved and able to assist?
- What activities can team members utilize to engage the individual (board games, movies, puzzles, FaceTime with families, etc.)?
- Are documentation changes required? (use of paper)

NO ↓

End: Follow up per usual procedure
